Product Modifications

Pro-face America has a Product Modification Department that is unequalled in the industry. We can tailor our products to meet the individual needs of your organization. Benefits of Product Modification include part number protection, price stability and unique industry offerings!

Custom Overlays or Logos

Put YOUR company's brand out front! We can provide HMIs with custom overlays or logos using YOUR artwork or logo. Use our Custom Overlay Tool to download a template for the unit you are interested in, Create the overlay YOU want, and then upload your creation into our tool. <https://www.hmioverlays.com/>

Bundled Solutions

Pro-face can combine any Hardware / Software configuration under a single part number to make ordering easier than ever! The bundling option also provides a single price for a complete solution!

WATCH VIDEO

Once created, easily re-order with a unique part number specific to the chosen configuration!

Custom IPC Images and Pre-Loaded HMI Projects

Reduce engineering set-up time and costs! Let us work WITH your company to create an image the way YOU want it. Your custom image will be shipped on every new product you purchase and stored here at the factory for your piece of mind.

Custom Hardware*

Do you need a higher capacity drive than we offer? Do you need more memory? Do you need a third party device and drivers installed BEFORE we ship the product to you? Our Technical Engineering staff will configure your hardware to meet the specifications YOU require.

Find your local distributor now to see what we can do for you!

*Product Modifications are non-cancelable, non-changeable, and non-refundable.

HMI Screen Editor & Logic Programming Software

GP-Pro EX +

Create Your HMI Application in Minutes ▶

GP-Pro EX is the easy-to-use development software for Pro-face HMI and IPC units. With a wide array of application development tools, expanded diagnostic features and simulation capabilities, GP-Pro EX is capable of handling the most demanding HMI applications.

Set up communications

- Choose and set up PLC and third-party devices effortlessly
- System settings are logically arranged and easy to find

Design application/screens

- Drag-and-drop addressing, parts and colors
- Efficient features to reduce development time
- Create consistent look and feel using the user-defined templates

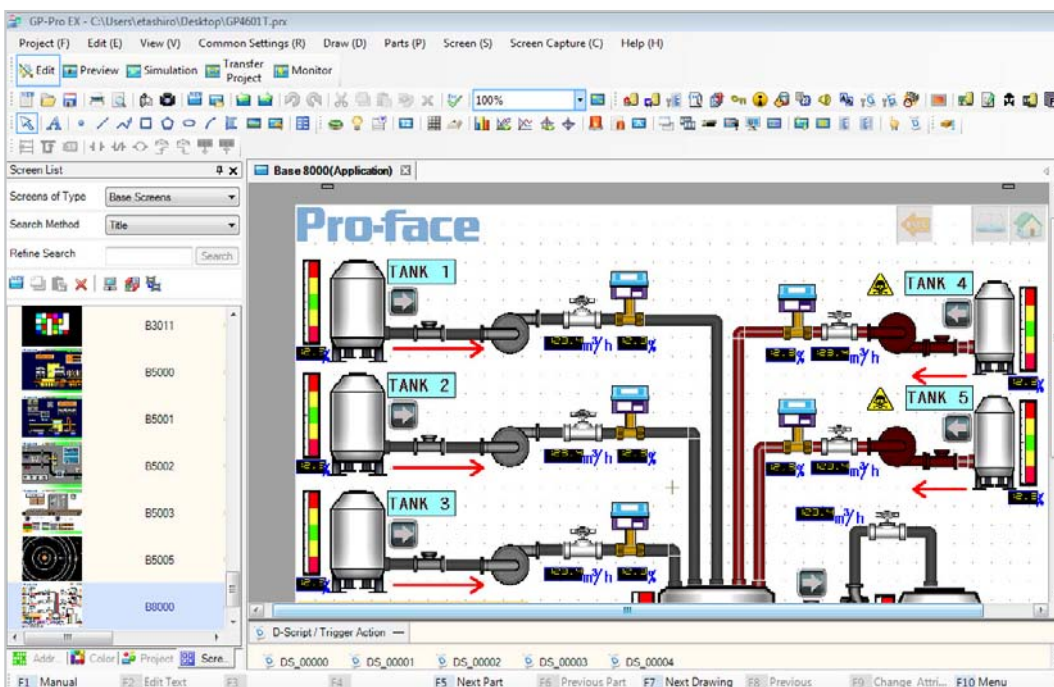

Simulate and test

- Verify before you travel
- Debug your application without hardware
- Test without downloading

Download/transfer

- Tamper-proof HMI application – password-protected project source

One development software for both dedicated and open windows-based operator interfaces.

Control Room

Plant Floor

Pro-face open-platform HMI

Application software for sharing user-defined factory-floor data throughout the corporate enterprise

+ GP-Viewer

▶ Monitor and Control Multiple Operator Interfaces from a Single Remote PC.

+ Camera Viewer

▶ Record, Display and Playback Live Video of Industrial Operations on a Remote PC.

+ Pass Through

Programming and monitoring PLC via operator interface.

+ Remote PC Access

Harness the power of a PC from your dedicated HMI.

+ Memory Loader

Field maintenance and backup with data protection.

+ Transfer Tool

Easy machine maintenance and data log retrieval.

+ WebServer

View HMI information and alerts through a web browser.

+ Remote HMI

▶ Monitor & control HMI screens from a smart phone or tablet (data input, send work instruction, etc.).

+ WinGP

▶ Runtime software for GP-Pro EX created applications.

+ FTP Server

Upload and download data files to the operator interface over the internet.

Pro-face Remote HMI +

Pro-face Remote HMI allows you to check machines and equipment for alarms, operating status, and other information using a tablet or smartphone from anywhere on the factory floor.

Quick steps to use Pro-face Remote HMI

STEP1

Hardware Preparation

Prepare Wireless Router and connect to HMI.

STEP2

Transfer Project File

Adjust application in GP-Pro EX and transfer it to HMI.

STEP3

Install Remote HMI on a tablet or smartphone

Download and install Pro-face Remote HMI on a tablet or smartphone. Search HMI and connect to monitor the HMI screen.

***Remote HMI Server license is required separately to monitor IPC and PC.**

Pro-face Remote HMI Client for Windows +

Features

Multi-Monitor Mode

Up to 6 screens can be displayed in one PC screen.

Full Screen Mode

The windows of the PC screen can be resized to the PC screen max. size.

Multi-client Function

For checking the status of equipment from different points of view, multiple PCs can be operated simultaneously.

Synchronous and Asynchronous Operation Mode

Pro-face Remote HMI Client for Win supports synchronous and asynchronous operation modes which switch during operation. A new parameter in the GP-Pro EX setting provides the option to limit the operation modes for the Pro-face Remote HMI Client for Windows.

Alarm Monitor Function

Indicating the status of each HMI in the overview reduces the time for identifying the faulty system and further reduces the downtime and associated costs. Besides the status bar for each HMI, any alarm can also trigger an alarm sound.

LEARN MORE

Efficient and easy to use

- Remote access for programming, diagnostics, control, and monitoring
- Speeds up operations and reduces machine downtime

Works everywhere, for everyone

- Operable for all application and segments
- Available from a desktop PC, laptop, or tablet

Reliable and Safe

- Cybersecure (end to end) for both original equipment manufacturers and end users
- Secure access to remote devices over the internet

BLUE Open Studio

Line Management Lite SCADA +
VERSION UP

Flexible software for your need

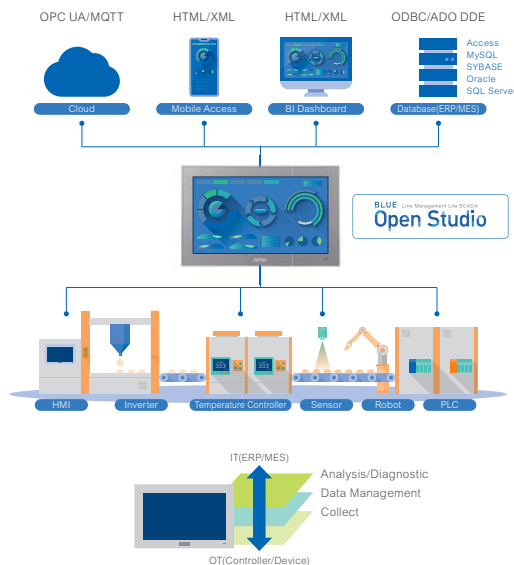

Pro-face BLUE Open Studio is a development and runtime software that incorporates various tools users need to create SCADA HMI applications, dashboards and OEE interfaces.

Basic Features

Scripting	Animation	Recipes	Email (SMTP)
Security	Database	Multi-touch	FTP
Symbols	Events	Reports	Historical Performance
Tags Database	Graphics and Design Tools	Scalable	PDF Export
Troubleshooting	Trends	Scheduler	SSL Support for Emails
Gestures	Multi-Language	OPC	DDE Client
Alarms	ActiveX and .NET	Intellectual Property Protection	Custom Widgets

Connectivity

250+ available communication drivers for PLCs and many other devices.
Native OPC interfaces such as OPC UA/DA
Active X and .Net controls
Support upper connectivity to DB through MQTT.

Database

Connect to any SQL database (Microsoft SQL, MySQL, Sybase, Oracle), or Microsoft Access or Excel, and ERP/MES systems (including SAP), even from Windows Embedded Compact Edition. BLUE Open Studio is flexible, offering a built in interface that doesn't require knowledge of SQL for trends, alarms/events, grid and other objects).

OPC

BLUE Open Studio provides native OPC interfaces, such as OPC DA (Server/Client), OPC HDA(Server), UA (Server/Client) and OPC .NET 3.0 (Client). BLUE Open Studio also supports OPC XML.

Trends

Real-time and Historical trends, and SPC functionality are supported. Log data in binary format, or to any local or remote SQL database. Color or fill trends with graphic elements to enhance clarity of data. Date/ Time based or numeric (X/Y plot) trends give you the flexibility to display information that best suits your application.

Custom Widget

Custom Widgets provides the ability to integrate third-party web-based controls into the HMI/SCADA project screens. Develop and share a library of controls that can be easily integrated into an application and accessible through multiple platforms.

Historian

BLUE Open Studio includes support for saving historical data from some task worksheets to a Historian database or AVEVA Insight.

Import Wizard

PanelMate (Eaton and Cutler Hammer)
FactoryTalk View ME/SE (Rockwell)
PanelBuilder32SESSE (Rockwell)

BLUE Line Management Lite SCADA
Open Studio

Remote Access

Access your BLUE Open Studio Screen from any device with a browser that supports HTML5, such as iPads, iPhones, Android devices, Windows devices, and others.

License Lineup

To version-up from Version 8.0 / 8.1 to 2020, version-up licenses are required. In addition, upgrade licenses are available to upgrade (ex, from Line management plus to Supervision)

PS6000 + BLUE Open Studio

Hardware and software association to improve your business

1 Full support & Integration on HW, SW and OS

Our dedicated support team ensures that you have a single contact window to resolve any issues

Integration is easy across our hardware, software and operating systems so commissioning is completed even faster

2 Save time & resources on validation and commissioning

PS6000 Series and BLUE Open Studio configured-to-order association is ready to use after our extensive testing and validation process, so you can save time, money and resources and have your application up and running

3 Sustainable supply & compatibility

Enjoy one supplier for your software and hardware requirements

Stress free replacement with ongoing development to meet industry requirements

Save Time

Save Money

Versatile Software

Revolutionary new software, BLUE offers an alternative experience in HMI project design. Anyone can easily create and change dynamic screens.

Refined

High quality graphics

Clearer fonts and screen parts make an obvious difference. The clarity is not affected by zoom level.

Stylish design

Customize gradation and transparency to meet your needs. Stylish expression including transparent effects.

Simple & Easy

One source, multiple ways to present

Support HMI project designer to adapt/customize projects and create easily situational awareness projects delivering more intuitive projects to the operators.

View all needed information at once

Simply display all necessary screens in one place. Multi-screen information gives rise to improvement in operation efficiency.

Responsive Behavior (Dock panel)

Several pages in one screen, and independent navigation in each section. Adapt the size of information to meet your needs with one click on the dynamic display.

Highly flexible graph features

Using data analyzing features, such as graph comparison, can produce more expressive insight than ever before.

Change the value of a variable without programming

Use a converter to change the value of a variable from the defined unit, range, scale, and expression without programming.

Connected & Secured

Pro-face connectivity

User-friendly protocols allowing you to connect your devices with ease via multiple interfaces and connect OT to IT with OPC-UA server.

Remote Access NEW

Remote Visualization on PC or Tablet / Smartphone with new Web View features of BLUE.

See status of equipment or devices in the right place at the right time.

Simple steps to start to Remote Access

Secure remote access solution

"Pro-face Connect" is a ready-to-use solution for Remote Access Over Internet on ST6000 Series without programming or configuring each device. Start using the cloud based "Pro-face Connect" Smart Industry solution on your existing network without involving your IT department. No network or firewall configurations are required and still the highest level of security and encryption is in place from end to end, from any PC, tablet and smartphone to your machinery.

Enhanced cybersecurity against basic intentional attacks

Need admin rights to download project to HMI target
 Auto user log out after predefined idle time
 Doing security checking during booting
 Secure Ethernet download supported by IPSec and password protected project file

GP4000 Standard

Description

Best in Class Connectivity, Powerful HMI Functionality and Full Compatibility with legacy Pro-face GP-Pro EX and GP3000 products. GP4000 HMI drivers allow you to “talk to” your preferred PLC, vision system, motion controller, temperature controller, inverter, bar code reader, and actuator.

Easy to Use: Operators can easily monitor conditions and the operating environment in real time using realistic 3D buttons, lamps, and gauges.

Saves Energy: Reduces on-site power consumption in a variety of ways including an on-board LED backlight in all models, and a dimmer setting used to decrease and eventually stand-by the display after being idle for a set period of time.

Quick On-site Recovery: Simply touch the alarm message to check the relevant data in chronological sequence.

Remote Monitoring: GP-Viewer EX software provides various remote monitoring functions, such as checking the screen of the GP located on a production site from a remote office.

Features

- 65,536 Colors, Clear, Bright, High-Resolution TFT Display
- Energy Efficient LED Display
- No Grid Analog Touch Panel for Improved Visibility and Precise Part Placement
- Supports Up to Two Protocol Drivers Simultaneously
- High Speed Application Transfer, 10 Times Faster than Conventional Operator Interfaces
- 10/100 Base-T Ethernet, USB, and Serial Communication Interfaces
- High-Definition Part Images and Multi-Language Support
- Custom Overlays available
- Remote HMI compatibility (tablet/phone)

GP4000 Rear Mount

Description

The GP4000 Series Rear-Mount model is an HMI that can be mounted from the rear of an equipment control panel. Conventional programmable displays are typically designed to be mounted from the front, and have a bezel that projects past the front of the equipment control panel.

By offering a rear-mount model that can be mounted from the rear of an equipment control panel to meet the increasing need for design-conscious equipment in the industrial world, Pro-face is now able to provide a mounting method that matches industry needs in terms of equipment appearance and overall control panel design.

Using a rear-mount model also makes it possible to keep the control panel and display area flat. This has the benefit of preventing the accumulation of dust and mold, and even allows the display to be used in medical equipment and other devices used in environments where hygiene is important.

Features

- Equipment control panel and display area can be kept flat
- Available in four sizes: 12.1", 10.4", 7.5", and 5.7"
- Compliant with a variety of international standards
- Supports GP-Pro EX, screen editing and logic program software for the existing GP4000 series

GP4000VM

Description

Introducing the GP4000VM series, a video unit compatible HMI. Like all Pro-face hardware, the Pro-face GP4000VM series offers extensive connectivity with a wide range of industrial controllers. This series includes the 12.1" PFXGP4621 and the 10.4" PFXGP4521 displays, both of which allow for a video unit to be mounted on the back with minimal effort.

Mount a Video unit or show analog camera images on a GP unit. Review information on the video unit module and RGB Input Unit.

Visualization on manufacturing floors has become increasingly important to manage product development and avoid potential line errors. Utilizing camera monitoring allows machine operators to view and track activity, and address any hazards quickly. To address the needs of these customers, Pro-face has expanded the GP4000 Series with a video unit compatible HMI.

Features

- VM Unit (GP3000-VM01)
RGB Input Unit (GP3000-RGB201)
- Easily mounted on the back of unit
- Programmed easily with GP-Pro EX
- Compatible with Pro-face Remote HMI
- Compatible with EZ Series
- Camera images display any portion of machine or assembly line
- Available with conformal coating.

GP4G01 Pro-face IoT Gateway

Description

The new Pro-face IoT Gateway, GP4G01, relays data communication between the HMI and the PLC. No ports and no program changes are required, and it retains communication of the connected devices even when Pro-face IoT Gateway is powered off.

Features

- Relaying data communication between HMI and PLC (when using the gateway mode)
- Connect without serial communication I/F available
- Collect data without changing programs
- Change settings on a Web browser

GP4000 Modular

Description

This dedicated operator interface touch screen is ideal for OEMs and high graphical detail applications. It is part of a latest line of Pro-face brand operator interfaces. The bright, crisp, and clear QVGA display of this model is complemented with a large viewing area, and no grid analog for improved visibility and precise part placement.

A host of features include Ethernet, USB, and RS232, 422, 485 serial ports. The extensive network connectivity allows support of up to two simultaneous protocols making this a highly versatile operator interface.

Features

- 65k Color, Clear, Bright, High-Resolution TFT Display
- Energy Efficient LED Display
- No Grid Analog Touch Panel for Improved Visibility and Precise Part Placement
- Supports different types of Protocol Drivers (communicates to two selected drivers)
- Separate front & rear module for quick installation in 22mm hole
- 10/100 Base-T Ethernet, and USB

GP4100 Compact

Description

The Pro-face GP4100 Series compact operator interface offers a crisp, clear and bright, 480 x 272 pixel full color TFT display with 65,536 colors. Small, powerful, and easy to use!

Equipped with your choice of Ethernet or Serial Port options, this small, but powerful compact HMI can be used in a number of applications.

Features

- Crisp, clear and bright, 480 x 272 Full Color Display
- No Grid Analog Touch Panel for improved visibility and precise part placement
- Touch Panel operation within a text panel replacement form factor
- Energy efficient, maintenance free LED backlight

GP4000H Graphical Pendant Station

Description

The Pro-face GP4000H Graphical Pendant Station offers multiple models to meet the needs of your application. The standard product line offers extensive, built-in, time-saving features that help customers develop fast, consistent, standardized graphical interfaces. Add single platform data management and control with GP-Pro Ex and Pro-Server EX software to complete the winning combination.

Features

- Tethered HMIs with full graphic touch screen
- Built-in Safety Features: Emergency Stop, 3-Position Enable Switch, and Key Switch
- Ideal for use with portable machine diagnostic or maintenance carts
- Connect directly to PLC or use easy disconnect access points

LT4000 Modular

Description

The LT4000M provides both HMI, digital and analog control in a single unit.

A unique modular style allows the display and rear module to be mounted directly (to each other) or separately (connected by a 3 or 5m cable).

Features

- Compact all-in-one unit for easy installation in small spaces
- 22mm hole mounting (similar to a push-button) saves time
- Flexible installation choices for integrated or separated display and rear module

Mount the unit as one (with 22mm hole mounting), or separate with the processor on a DIN rail with the available separation cable.

Easy wiring with removable spring I/O connector

EZ Series USB Solutions

Description

EZ Illuminated Switch can accommodate the need for hardware switches and light indicators. Displayable indicator colors and patterns can be specified via the software.

EZ Numpad is an alphanumeric keypad that features the same 22-millimeter holes used to install hardware switches and lamps used on production work sites.

EZ Tower Light makes your status system easier to understand by leveraging the multi-color LEDs which allows the flexibility to control 4 colors and 2 flash rates per unit.

EZ LAN Adapter is a conversion adapter that attaches to the USB (Type A) interface on the display unit so you can use it as an Ethernet interface.

Features

- Easy to connect - USB Connection
- Easy to install - 22mm Hole Mounting
- Easy to setup - No need for special programming, easy setup by GP-Pro EX
- Multi-color LED's allow colors and functions to be changed per pre-set status
- Switch between input and function keys

Think Outside the HMI

Illuminated Switch

A unit of 5 illuminated switches with multiple color LED easily connected with HMI via USB

General Specifications

Rated Input Voltage	5 Vdc (powered from USB bus)
Input Voltage Limits	4.75 to 5.25 Vdc
Power Consumption	2.0W max
Surrounding Air Temperature	0 to 55° C (32 to 131° F)
Storage Temperature	-20 to 60° C (-4 to 140° F)
Environmental Ratings	IP65 front face / IP20 back
Supported Software	GP-Pro EX Ver. 3.1 or later
Certifications	CE, CSA, UL, RoHS

Product Specifications

Part Number to Order	PFXZCCEUSG1
External Dimension	W 122 x H54 x D 28mm (W 4.80 x H 2.13 x D 1.10in)
Weight	110g (0.24lb) or less
Number of Switches	5 illuminated switches
Durability of Switches	1 million times or more for each switch
LED Colors	Red, Green, Yellow, Blue, White, Orange
Function Key Labels	Printable and replaceable insert labels
USB Cable Length	1m (removable)
Connection	USB I/F: Type B (socket), USB 2.0 Full Speed
Connectable HMI	GP4000, GP4000M, WinGP, LT4000M, SP5000

Type A

*When using the unit with GP4000M, it is necessary to use self power USB HUB.

USB 2.0*

Numpad

Storage Temperature	-20 to 60° C (-4 to 140° F)
Ambient Operating Temp	0 to 55° C (32 to 131° F)
Environmental Ratings	IEC/EN 61131-2 compliant
Supported Software	GP-Pro EX Ver. 4.08 or later

Product Specifications

Part Number to Order	PFXZCGEUUE1
Supported Software	GP-Pro EX Ver. 4.08 or later
Connectable HMI	GP4000 Series
Ethernet I/F	Modular Jack (RJ-45), IEEE802.3i/IEEE802.3u, 10BASE-T/100BASE-TX
USB I/F	Type A (plug), USB 2.0 High-Speed (480Mbps)
External Dimensions	W105 x H40 x D27 mm (W4.13 x H1.57 x D1.06 in.)
Cable Length	0.5 m (1.64 ft), including connections
Weight	100 g (0.22 lb)

SP5000 Enhanced HMI

Description

Pro-face has created a new market with the new SP5000 Series interface terminal—or Smart Portal—a new category of HMI, to improve production efficiency by better leveraging the big data generated at production work sites and offices.

The new SP5000 Series interface terminal has been developed to respond to the need to obtain data and supply it where required in an appropriate format for efficiency improvements and the need safely network production work sites with offices.

Until now, networking existing production worksite facilities with an office has necessitated the introduction of large-scale systems and the upgrading of facilities. By introducing the Smart Portal to the production work site, information such as production results and machine data, and production management data required in the office can be made smart at low cost. With the release of the SP5000 Series, Pro-face hopes to create a new Smart Portal market, which it forecasts to reach the same scale as the current HMI market within the next five years.

Features

- 16-million-color TFT LCD multi-touch panel
- Modular design and screwless box module attachment for improved maintainability when repairing or replacing.
- Available in 12 configurations – 6 display module models and 2 box module models
- Supports applications that run on Windows
- Equipped with two Ethernet ports standard
- Equipped with two standard SIO ports and up to three USB ports
- By using together with Pro-face Remote HMI, it is possible to check and operate machinery from mobile devices such as smartphones and tablets
- Compliant with various international safety standards and IP65F/IP66F/IP67F for use in a broad range of situations

¹ The front face of the unit, installed in a solid panel, has been tested using conditions equivalent to the standards shown in the specification. Even though the unit's level of resistance is equivalent to these standards, oils that should have no effect on the unit can possibly harm the unit. This can occur in areas where either vaporized oils are present, or where low viscosity cutting oils are allowed to adhere to the unit for long periods of time. If the unit's front face protection sheet becomes peeled off, these conditions can lead to the ingress of oil into the unit and separate protection measures are suggested. Also, if non-approved oils are present, it may cause deformation or corrosion of the front panel's plastic cover. Therefore, prior to installing the unit, be sure to confirm the type of conditions that will be present in the unit's operating environment. If the installation gasket is used for a long period of time, or if the unit and its gasket are removed from the panel, the original level of the protection cannot be guaranteed. To maintain the original protection level, be sure to replace the installation gasket regularly.

CANopen FLEX NETWORK

Description

Combine the SP5000 power box unit (SP5B10) with any SP5000 display and either CANopen or Flex Network Master module for great performance, flexibility and network connectivity. Add single platform data management and control with GP-Pro Ex or Pro-Server EX software to complete the winning combination.

Connect with the SP5000 Series Power Box to expand the I/O feature and create a unit with simple control and:

- Reduce cost by downsizing equipment.
- Install optional features without changing the PLC configuration of the original equipment.
- Improve equipment on manufacturing floors by utilizing a data-mixed HMI that can connect with the host system directly to collect sensor information, as well as, a range of controller information to respond to data management trends accelerated by IIoT.

Features

- Screen creation and control programming with a piece of software
- Bit input/output 1024 points, Integer input/output 256 points
- Large-sized display (19" wide to 7" wide)
- Easily adding I/O features
- Mobility products supported (Pro-face HMI, Pro-face Connect)

SP5000X eXtreme HMI

Description

Pro-face has developed a sunlight readable screen that is resistant to direct sunlight and extreme temperatures. The liquid crystal panel (1000cd/m²), provides an anti-reflection/anti-glare screen, and a high transmittance design. Easily read on-screen applications, even in high brightness environments.

With an enhanced information display unit and improved operability, this product is suitable for multiple applications under harsh environmental conditions including use in special purpose vehicles such as fire trucks and construction equipment; parking lots and gas stations; and the oil and gas industry.

Add Pro-face Connect, our remote access application, to create a full IoT solution to manage and control multiple devices from anywhere, at anytime.

Features

- Enhanced readability under sunlight.
 - High brightness liquid crystal panel (1000cd/m²)
 - Anti-reflection (Anti-glare)
 - High-transmittance design
- Environmentally resistant
 - Vibration/Shock Resistance approximately 2 to 2.7 times
 - Operating Temperature: -30° to 70° C (-22 to 158 °F)
 - IP66F, Type 4X (indoor use)
- Efficient maintenance
 - Modular structure
 - Exchangeable system card
 - Battery-less
- Easily start Pro-face IoT solution with Pro-face Connect or Remote HMI
- Extensive Connectivity with a wide range of devices and field network

STW6000 BASIC WEB HMI

Description

Pro-face America has developed the new STW6000 Series Basic Web HMI. Many industrial automation devices support HTML5, which can be displayed on PCs, tablets, and smartphones. As a Web HMI, STW6000 can easily display HTML5 data from multiple devices, allowing complete visibility over a company's intranet.

Many industrial devices and even simple instrumentation components now have an embedded web server and a fixed web page that serves up diagnostic data and often allows for configuration of the device via HTML5. Some of the more complex devices, like PLCs, allow customers to customize HTML5 pages loaded on an embedded web server. The trend with SCADA packages allows publication of screens in HTML5 format for mobile devices.

The STW6000 series allows visibility to all these devices, using a web browser platform and requires no programming beyond configuring and entering URLs.

Features

- 16-million-color TFT LCD multi-touch panel
- Aluminum Front Panel
- Enhanced Cybersecurity
- Enhanced Data Management with BLUE Open Studio
- Equipped with Ethernet ports standard
- Supports HTML5
- 4.3" to 15.6" Wide Display sizes available

ST6000 BASIC HMI

Description

Pro-face America has developed the new ST6000 Series Basic HMI. This basic HMI has a sophisticated design that transforms simple machines into a valuable part of your automation solution.

The aluminum front panel provides

The ST6000 series allows visibility to all these devices, using a web browser platform and requires no programming beyond configuring and entering URLs.

Features

- Sophisticated design that transforms simple machines
- Aluminum Front Panel
- Enhanced Cybersecurity
- Enhanced HMI Screen Development with BLUE or GP-Pro EX
- Simple design and interface increase productivity and efficiency
- Seamless connectivity with various devices enhances flexibility and increases value
- 4.3" to 15.6" Wide Display sizes available

STM6000 MODULAR HMI

Description

The STM6000 series, is a complement to the ST6000 family, and brings a new level of visualization to the Basic HMI. Pro-face has achieved a superior quality display that improves operability and is unmatched by any other basic HMI. The product can also be installed easily as no tools are necessary and can be installed quickly with a unique push-button mounting system through a 22 mm circular hole.

Features

- Sophisticated design that transforms simple machines
- Aluminum Front Panel
- Enhanced Cybersecurity
- Enhanced HMI Screen Development with BLUE or GP-Pro EX
- Simple design and interface increase productivity and efficiency
- Seamless connectivity with various devices enhances flexibility and increases value
- 4.3" or 7" Wide Display sizes available

AGP3000H-ADPCOM-01	Conversion Adapter for interfacing with a GP3000H Cable Connector and External Output terminal block."
CA3-CBL232/5M-01	Cable for RS-232C connection between various hosts and the GP4000 (5m)
CA3-ADPCOM-01	COM 1 Pin conversion adapter on the GP3000
CA3-ADPSEI-01	Adapter for SIEMENS MPI when using Profibus connector and cabling w/ AGP3000.
CA3-ADPTRM-01	Connects output from a GP unit's Serial Interface (D-sub 9 pin socket) directly with an RS-422 terminal block.
CA3-CBL422-01	Cable for RS-422 connection between various hosts and the GP4000 (Plug Type) (5m)
CA3-CBL422/5M-01	Cable for RS-422 connection between various hosts and the GP4000 (Socket Type) (5m)
CA3-CBLA-01	Cable for directly connecting an A Series CPU (5m)
CA3-CBLCBT232-01	Cable for converting a D-Sub 9-pin plug to a D-Sub 25-pin socket (20cm)
CA3-CBLCBT422-01	Connects a standard RS-422 cable (GP Connector,D-Sub 25-pin) to the GP (20cm)
CA3-CBLFX/1M-01	Cable for directly connecting an FX Series CPU (1m)
CA3-CBLFX/5M-01	Cable for directly connecting an FX Series CPU (5m)
CA3-CBLLNKM-01	Cable for directly connecting a Q Series Link Unit (5m)
CA3-CBLMLT-01	Connects a host controller to the GP for multi-link(n:1) communication
CA3-CBLQ-01	Cable for directly connecting a Q Series CPU (5m)
CA3-CBLSYS-01	Cable for directly connecting a SYSMAC Link Unit (5m)
CA3-ISO232-01	Unit for connecting various hosts and the GP4000 by insulating
CA3-ISO485-01	Unit for connecting various hosts and the GP3000 by insulating
CA3-MDCB11	Cable for connecting a 2-port adapter to the GP3000 (5m)
CA3-MPI-PG1-PFE	Connects a host controller to the GP for MPI communication.
CA3-MPI-PGN-PFE	Connects a host controller to the GP for MPI communication.
CA4-ADPONL-01	For COM 2 Termination adapter required for communication through the RS-422/485 connection
CA6-CBLTTY/5M-01	Cable for connecting a PLC S5 series to the GP (5m)
CA7-CBLCVRGB-01	For converting DVI-A to RGB
CA9-USBAMB/5M-01	USB cable for RGB Input Unit touch panel operation (Host-Slave: Mini-B) (5m)
FP-CV02-45	For outputting image signal from host to GP (4.5m)
FP-DV01-100	For outputting image signal from host to GP (10m)
FP-DV01-50	For outputting image signal from host to GP (5m)
GP070-MD11	Interface unit required for simultaneous use of A/QnA/FX Series peripheral devices
GP2000H-AP232	Conversion adapter to connect GP operation data to RS-232C D-Sub and power/DIO terminals.
GP2000H-AP422	Conversion adapter to connect GP operation data to RS-422 and power/DIO terminals.

GP3000H-CBLSD-3M	Standard type cable between the GP4000H Conversion Adapter and the GP4000H.
GP3000H-CBLSD-5M	Standard type cable between the GP4000H Conversion Adapter and the GP4000H.
GP3000H-CBLSD232-3M	The cable between the GP2000H Series RS-232C Conversion Adapter and the GP4000H
GP3000H-CBLSD422-10M	The cable between the GP2000H Series RS-422 Conversion Adapter and the GP4000H
HMI-CAB-ST52	RS-232C Cable for connection to Allen-Bradley SLC5/03, 5/04, Contrologix, & Compactlogix PLCs (12ft)
HMI-CAB-ST52-50X	RS-232C Cable for connection to Allen-Bradley SLC5/03, 5/04, Contrologix, & Compactlogix PLCs (50ft)
TWDFCW30K	3M Cable Extension
PFXZCBADTM1	Connects output from a GP unit's Serial Interface (D-sub 9 pin plug) directly with an RS-422 terminal block.
PFXZCBCBCVR41	Cable for converting a D-Sub 9-pin plug to a D-Sub 25-pin socket (20cm)
PFXZCBCBMD1	Connects Mitsubishi PLC directly to the GP4000 (D-sub 9 pin plug) using 2 port adapter II (RS-422) (5m)
PFXZCBCBML1	Connects a host controller directly to the GP4000 (D-sub 9 pin plug) for multi-link (n:1) communication.
PFXZCFAF1	Fasteners/mounting clips (4 pcs per package)
PFXZCGEUUE1	USB Ethernet conversion adapter easily added Ethernet interface (RJ-45) on HMI via USB
PFXZCHWG154	Provides dust and moisture resistance when this product is installed into a solid panel (1 piece)
PFXZCHBMFBL1	SP5000X Series, Bracket for fixing Box module to Display module (1 piece)
PFXZCHBMFBS1	SP5000X Series, Bracket for fixing Box module to Display module(SP-5490WA) (1 piece)
PFXZCHEUJ1	Expansion unit for the SP5000 Series/SP5000X Series in the J1939 communication network
PFXZCHFUFB1	SP5000 Series/SP5000X Series, Bracket for fixing Fieldbus unit to Box module (1 piece)
PFXZCHCND3	Connector with fixable screws for DC power supply cables for 12" and 15" display (Angle type, 5pcs/set)
PFXZCIEXMB2	Extension cable that attaches USB interface to the front panel.
PFXZCIDS42	Disposable, dirt-resistant sheet for the display (5 sheets/set) for ST-6200WA.
PFXZCIAFTF1	Installation fastener for ST-6400WA, ST-6500WA, ST-6600WA, ST-6700WA (2 pcs/set).
PFXZCM6DSA	Dock Station Adapter
PFXZCM6SM3	Remote Cable Display 3m

PFXZCBOP121	Disposable, environmental resistant cover for 12.1 inch (1 sheet/set)
PFXZCBOP41	Disposable, environmental resistant cover for 3.5 inch (1 sheet/set)
PFXZCBOP61	Disposable, environmental resistant cover for 5.7 inch (1 sheet/set)
PFXZCBOP71	Disposable, environmental resistant cover for 7.0/7.5 inch (1 sheet/set)
PFXZCBSD4GC41	SD Memory Card (4 GB, CLASS4)
PFXZCDAT72	Panel cutout adapter for mounting 7-inch Wide Advanced Display in cutout for GP2400, GP3400, or GP4400.
PFXZCDCNAUX1	AUX connector required in case an external output is used (5 pcs/set)
PFXZCDCVUS1	Front USB cover with fixing screw, corresponding to IP66f, IP67f, Type 1/4X. Indoor use only. (5 pieces/set)
PFXZCDDS102	Disposable, dirt-resistant sheet for the display (5 sheets/set)
PFXZCDDS122	Disposable, dirt-resistant sheet for the display (5 sheets/set)
PFXZCDSCCFA321	CFast Card (32 GB, SLC)
PFXZCDSCCFA322	CFast Card (32GB, MLC), System Card for SP-5B41
PFXZCHAG192	Anti-glare, dirt-resistant sheet for the SP-5800WC's screen (5 sheets/set)
PFXZCHAG152	Anti-glare, dirt-resistant sheet for the SP-5700WC's screen (5 sheets/set)
PFXZCGWG192	Provides dust and moisture resistance when SP-5800WC is installed into a solid panel (1 piece)
PFXZCGWG152	Provides dust and moisture resistance when SP-570WC is installed into a solid panel (1 piece)
PFXZGPF SR10W1	Overlay (Front Sheet) for Flat mount of GP4000 Rear Mount model (Color: White, 1 piece)

PFXZGPFSR6W1	Overlay (Front Sheet) for Flat mount of GP4000 Rear Mount model (Color: White, 1 piece)
PFXZGPFSR7W1	Overlay (Front Sheet) for Flat mount of GP4000 Rear Mount model (Color: White, 1 piece)
PS400-DF00	Disposable, dirt-resistant sheet for the GP unit's screen (5 sheets/set)
ZC9DS31	Disposable, dirt-resistant sheet for the GP unit's screen (5 sheets/set)
ZC9USCBMB1	Cable for transferring screen data between a PC (USB Type A) and the GP unit (USB mini- B) (1.8 m)
ZC9USCL1	USB (Type A) Cable clamp for 1 port products to prevent disconnection (5 clamps/ set)
ZC9USEXMB1	Extension cable that attaches to the USB (mini-B) interface on the front side of the operation panel (1m)

EZ Series

CA5-USBEXT-01	Extension cable attaching USB (Type A) interface to front panel (1m)
PFXZCCA1	Accessories Kit — Anti-rotation Tee, USB cable clamp to prevent disconnection (USB/B, 1 port), (5 pcs/each) Insert Label for EZ Illuminated Switch (3 pieces/sheet)
PFXZCCA1KB1	Kit: Anti-rotation Tee (5pcs), USB cable clamp to prevent disconnection (USB/mini-B, 1 port, 5pcs) Function Key Label for EZ Numpad (2pcs/sheet)
PFXZCCAT1	2mm spacer to adjust installation panel thickness (for EZ Illuminated Switch), with 22mm circular hole
PFXZCCCVSS1	A protective cover to protect the sensing screen of EZ Fingerprint Recognition Unit (5 pcs/set)
PFXZCCNTSS1	Nut to install EZ Fingerprint Recognition Unit (5 pcs/set)
PFXZCDWGS1	Provides dust and moisture resistance when EZ Illuminated Switch is installed into a solid panel (1 piece)
PFXZCEATWM1	Attachment mounts the EZ Series Unit on the wall. Please use it when holding the EZ Series in your hands
PFXZGMNT1	Nut for installation to a solid panel (10 pieces/set)
PFXZGMSW1	Socket wrench to tighten and loosen the installation nut (1 piece/set)
XVGUZ02	Cable lock to prevent disconnection of USB cable
ZC9USCBMB1	Cable for connecting from an EZ Tower Light to a Pro-face's interface unit (USB A/mini B) (1.8m)

PS6000 Series Industrial PC

Description

New PS6000 Series from the HMI leader: Robust as a terminal, Open and High-performant as a PC, even more economical.

You have an increasing need for data management and flexibility with smart manufacturing, digitization, IIoT, Edge computing.

PS6000 brings high-end HMI capabilities, building PC-based architecture from the needs of the application, selecting software, system structure, operation efficiency, data flow.

PS6000 makes the next stage of your digital transformation and new experience, providing flexibility, simple visibility, and reliability.

Features

Modular: Connect a Corei3, Corei5, Corei7, or Celeron Box and Display in a range of sizes from 10 to the ultra-large 22 inches. Flexibly change the functions and sizes.

Box: Stationary box type suitable for an environment and equipment that does not require operation and display. Both landscape and portrait placement available. Using Pro-face Remote HMI makes monitoring possible only when needed.

Powerful: A generous helping of the latest technology amounts to a surprising edge in performance. This means more power for equipment requiring high-speed equipment with different usability via HMI and PC.

Smart: Intuitive gestures for zooming and switching screens similar to popular tablets and smartphones for even smoother operation. Scroll, swipe, pinch, two-point touch, etc.

Remote solutions: Includes a proprietary tablet /smartphone app designed for use in industrial settings. The app offers a revolutionary debugging and remote monitoring experience.

PS5000 Series Industrial PC

Description

The PS5000 Industrial PC Series is innovative and flexible, offering high connectivity, reliability, and design.

This iPC offer includes Node Box PCs with ATOM CPUs which can be used with a modular & flexible Panel PC configuration with 12", 15", 19" or 22" display screens.

Features

Modular: Connect an Atom Box and Display in a range of sizes from 15 to the ultra-large 22 inches. Flexibly change the functions and sizes.

Slim: Panel-integrated type - drastically slimmer profile with less wasted space and high performance retained featuring optimized design for equipment that requires space-saving. Featuring an optimized industrial design for a 66% cut in the required depth. No fan means a smaller operation panel with no need to worry about exhaust heat, resulting in less cost to you.

Box: Stationary box type suitable for an environment and equipment that does not require operation and display. Both landscape and portrait placement available. Using Pro-face Remote HMI makes monitoring possible only when needed.

Powerful: A generous helping of the latest technology amounts to a surprising edge in performance. This means more power for equipment requiring high-speed equipment with different usability via HMI and PC.

Smart: Intuitive gestures for zooming and switching screens similar to popular tablets and smartphones for even smoother operation. Scroll, swipe, pinch, two-point touch, etc.

Remote solutions: Includes a proprietary tablet /smartphone app designed for use in industrial settings. The app offers a revolutionary debugging and remote monitoring experience.

PS5000 Slim Panel PC

The PS5000 Series is the newest line up in the Pro-face Industrial PC family. The three display sizes, 10", 15" and 19" offer a slim design, and low reactivity glass that creates less glare and higher contrast. This powerful IPC features a Core™ i3-4010U or Atom E3827 1.7 GHz processor, creating a powerful system for any production floor. Its aluminum housing adds to the PC's durability, while its multiple I/O ports lend to its flexibility. These units provide more robust storage options, as well as a bright and crisp TFT color display.

PS5000 Box PC

PS5000 Series is the highest performance industrial PC, offering high connectivity, reliability, and design. Our built-to-order lineup allows customers to choose the product that best suits their needs. Our Node Box PCs with Intel Core i7, Atom, and Celeron CPUs, can be easily paired with a modular & flexible 12", 15", 19" or 22" display screen—flexibly change the functions and sizes.

Also available as a stand-alone, the stationary box type is suitable for an environment and equipment that does not need operation and display. Both landscape and portrait mounting available.

FP6000 – Flat Panel Display

Description

Industrial Flat Panel Monitors FP6000 Series adapt with various host devices that you need, with a high-quality and stylish design monitor and high robustness. FP6000 Series fits the most suitable place for machine operation by installing separately to improve your machine's operativity.

Features

- Automatic resolution adjustment
- Supports Win10IoT Ent 2019 LTSC & Win10 (build 1809 or later)
- A wide range of Display sizes
- Straight forward connectivity
- Front USB port for easy data export
- Simple configuration of display and PC
- Easy installation with integrated mounting bracket and anti-drop lock
- Class 1 Div 2 Haz Loc Certification
- Designed and certified to run on most demanding industrial environments

FP5000 – Flat Panel Display

Description

Sharing the panel cut out dimension with the FP3000 Series, the FP5000 Series is the natural choice for upgrading your system. Automatic resolution and brightness adjustment eases upgrade and increase operation efficiency.

The FP5000 Series employs an analog resistive multi-touch touch panel that allows multi touch gestures even when wearing work gloves. Gesture operation greatly prevents unintended operation and the multi-touch panel film prevents display glass fragments from contaminating the processed goods, essential in the food and beverage industry.

In addition to cutting-edge functions such as gesture operation and a brightness sensor, the FP5000 Series provides a high level of environmental resistance with features like a maximum ambient operating temperature rating of 60°C and an IP67F protection rating that allows it to withstand washing with a high-pressure cleaner during hygienic maintenance of equipment.

Features

- Automatic resolution adjustment
- Supports operating systems from Windows XP to Windows 8.1
- 12Vdc battery operated devices and equipment
- Straight forward connectivity
- Front USB port for easy data export

Simple configuration of display and PC

- Easy installation with integrated mounting bracket and anti-drop lock
- Class 1 Div 2 Haz Loc Certification
